## DETAILED ACTION

### *Examiner's Statement*

1. Applicant's arguments, filed on June 30, 2005, with respect to Claims 1-37 have been fully considered and are persuasive. The rejections of 35U.S.C.102(e) and 103(a) have been withdrawn.

### *Examiner Amendments*

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

3. Authorization for this examiner's amendment was given in a telephone interview with Attorney Randal Ayers on September 12, 2005.

4. The application has been amended as follows:

In the claims:

- In claim 17, line 14, after "signal" insert --- , wherein the candidate interference source selected for cancellation is selected by:  
generating a plurality of classification measures associated with a plurality of interference scenarios,  
identifying as a dominant interference source the candidate interference source associated with the interference scenario which the classification measures indicate is the most likely interference scenario and selecting the identified dominant interference source for cancellation ---.

- Cancel claim 18.
- In claim 31, line 8, after “source” insert --- and using the identification of any dominant interference sources ---.
- In claim 33, line 11, after “map” insert --- and using the identification of any dominant interference sources ---.

***Allowable Subject Matter***

5. Claims 1-17 and 19-37 are allowed.
6. The following is an examiner's statement of reasons for allowance.
  - The prior art fails to teach a method/system of Claims 1-21 and 31-37 that specifically comprises the following:
    - The instant application is deemed to be directed to a non-obvious improvement over the admitted prior art of the instant application and the invention patented in Pat. No. US 6,442,384, US 6,118,805, and US 5,905,543. The improvement comprises identifying any of the candidate interference sources that comprise a dominant interference source based on the received signal and the information regarding the plurality of candidate interference sources; and demodulating the received signal to recover wanted information while compensating for interference with the aid of the information stored in the interference map and using the identification of any dominant interference sources.
  - The prior art fails to teach a method/system of Claims 1-17, 19-21, and 31-37 that specifically comprises the following:

--- The instant application is deemed to be directed to a non-obvious improvement over the admitted prior art of the instant application and the invention patented in Pat. No. US 6,442,384, US 6,118,805, and US 5,905,543. The improvement comprises classifying the interference scenario associated with the received signal based on the results of the identifying step; and selecting a demodulation algorithm based on the interference scenario classification.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
